

# Explaining Compliance

*'A timely and important set of analyses on how and why businesses respond to regulation in the way that they do from some of the leading authors in the field, covering business responses to both state and non-state regulatory systems.'*

— Julia Black, London School of Economics, UK

*'Taking a broad view of regulation, and covering a wide range of issues and industries, this collection is the most innovative effort to date to understand the responses of business firms to regulation. The book brings together an impressive group of scholars who analyze the concept of compliance and offer theoretically informed studies of its assumed links to regulation. A must read for both academics and practitioners, this ground-breaking collection firmly establishes a scholarly field of compliance studies.'*

— Ronen Shamir, Tel Aviv University, Israel

*'Business responses to regulation is a key area of social science research. Parker and Nielsen's collection brings together an excellent group of scholars with innovative, and I believe highly influential contributions that problematize the relations between regulation and compliance. The collection is a highly welcome addition to our field, that will re-define the research agenda on compliance. A significant achievement that will help to improve policy making and frame the scholarly research agenda for the years to come.'*

— David Levi-Faur, The Hebrew University of Jerusalem, Israel and the Free University of Berlin, Germany

*'A thoughtful collection on meaning and method in compliance. Parker and Nielsen assemble stellar scholars to provide a state-of-the-art understanding of business compliance with regulation.'*

— John Braithwaite, Australian National University, Canberra

---

Christine Parker is at Monash University, Australia and Vibeke Lehmann Nielsen is at the University of Aarhus, Denmark.
